

I would appreciate if your will not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Me and my family really enjoyed and value our privacy. Since the implementation of Indiana's Telephone Privacy law protections, it really make a difference to us because; first our days were not spoiled by the irritating telemarketers, we don't have to erase a lot of unwanted messages on our answering machine. It feels like finally all those nuisance left us alone. Please let us live peacefully in our home and that will be fulfilled if your office will not implement any proposal that would lessen Indiana's Telephone Privacy law protection. Thank you very much and God bless.
